

FROM THE DEAN: Diana E. Hess

When you are consistently ranked as one of the finest schools of education in the United States and among the best in the world, excellence is more than a goal, it's who you are. At the University of Wisconsin-Madison School of Education, we embrace fields of study that define the human experience: **EDUCATION** to challenge minds, **HEALTH** to impact lives, the **ARTS** to enhance creative spirits, and world class research to drive conversation forward. Our School's excellence is rooted in a talented faculty and staff — many of whom are nationally and internationally known for their research addressing critical issues facing our world today. Our faculty and staff work actively and passionately to serve their students and the community while living the **WISCONSIN IDEA**. The School offers a much broader and more diverse catalogue of undergraduate and graduate programs than traditional schools of education, including Art, Dance, Theatre, and Kinesiology. In fact, more than half of the School's undergraduates are enrolled in fields other than education. Step inside our red doors to explore your interests in the arts, education, or health professions.

On, Wisconsin!

UNIVERSITY OF WISCONSIN-MADISON

Teaching & Learning

The School of Education offers a broad array of programs, with its students and professors having a varied set of interests. The School houses arts, education and health programs. Through these diverse fields, those associated with the School are able to address some of society's most critical needs — from challenges in education at all levels to issues in health and other human services — while also contributing to the quality of life through the arts. Our departments are:

Art	Educational Psychology
Counseling Psychology	Educational Leadership & Policy Analysis
Curriculum & Instruction	Kinesiology
Dance	Rehabilitation Psychology & Special Education
Educational Policy Studies	Theatre & Drama

Service and the Wisconsin Idea

The School of Education embodies the Wisconsin Idea — one of the longest and deepest traditions surrounding UW–Madison. The Wisconsin Idea signifies a general principle that education should influence people's lives beyond the boundaries of the classroom. Whether in our schools, in our communities, or in our workplaces, the School of Education works to strengthen partnerships that reach every corner of the state, and beyond. The Morgridge Center for Public Service, housed in the School of Education, maintains a university-wide mission of connecting campus and community. The Morgridge Center offers service-learning and community-based research projects that help build a thriving democratic society and prepare students for lifelong civic engagement.

Advancing Diversity

The School of Education aims to promote a welcoming, culturally responsive, and supportive School community for all. We strive to recruit and support a diverse and outstanding faculty, student body, and staff to advance research and to develop future generations of artists, researchers, professionals, and education leaders. The Student Diversity Programs Office represents the School of Education's commitment to diversity and access to higher education. This office works to create and promote opportunities for pre-college, undergraduate, and graduate students as they strive to achieve their educational and professional goals. The School of Education's commitment to social justice is illuminated through our advancement of culturally responsive pedagogy and through our School's core principles of being an inclusive and diverse community and treating all with respect and dignity.

Study & Research

Research at the School of Education continues to thrive. As a key part of its mission, the School conducts and supports research of the highest quality in education, health and the arts. Of particular note, the School houses the Wisconsin Center for Education Research (WCER), one of the oldest, largest and most productive education research centers in the world. WCER is home to approximately 140 grant-funded projects that generate more than \$60 million of revenue in awards and services annually. The center's varied research has influenced educational policy and practice from preschool through doctoral programs for more than five decades. The School's health programs, meanwhile, are also renown for highly regarded research. The Department of Kinesiology is dedicated to researching and applying knowledge related to movement, exercise and human occupation, with the ultimate goal of enhancing human health, productivity and quality of life. Similarly, the arts programs present discovery on a regular basis in the form of exhibitions, concerts and performances, as well as traditional print publications.
